PROFILE SUMMARY

A motivated IT student skilled in Python, Java, PHP, and web development (HTML/CSS). Passionate about building user-friendly software solutions and collaborating on team projects. Experienced in UI/UX design (Figma, Canva) and problem-solving. Strong in project management, troubleshooting, and agile development.

EDUCATION

PHINMA University of Pangasinan | 2023 - Present
Bachelor of Science in Information Technology
Major in System Development

WORK EXPERIENCE

RJE Motor parts & Accessories Shop
Manager / Sale Representative

- Provide customer service for motorcycle parts and accessories
- Help customers identify their specific needs
- Offer expert advice on the right products
- Ensure a smooth and easy purchasing experience
- Share in-depth product knowledge to assist customers

MAJOR PROJECTS

Riddlers: Bugtong Guess

Final Project in Java | March 2024 - April 2024

IntelliJ IDEA | NetBeans | Java Swing

A Java-based riddle game featuring traditional Filipino puzzles with difficulty levels, scoring, and timed challenges.

- Developed a fully functional Java-based riddle game with interactive GUI using Swing/JavaFX
- Implemented a scoring system and dynamic difficulty adjustment
- Designed an intuitive user interface with Canva, resulting in positive user feedback

FIND ME : 3D Horror Game

Final Project in Android Developmet | Nov 2024 - Dec 2024

Unity | Blender | Xampp PHP | Canva

Find Me is a 3D horror mobile game developed in Unity where players navigate a terrifying maze to collect gems and escape while avoiding lurking dangers. The game features strategic gameplay, power-ups, and an immersive horror atmosphere.

- Developed Unity mobile game with 3D maze navigation and horror mechanics
- Implemented power-up system (speed boost, enemy freeze) and coin-based economy
- Designed procedural level generation and AI enemy behavior
- Key Technologies: Unity (C#), Blender, Canva (UI)

LIBTRACK

Final Project in Android Developmet | Feb 2025 - Mar 2025

Vs Code | Android Studio | Figma

A dual-platform library management system with a web admin dashboard and student mobile app .

- Developed cross-platform (web/mobile) library system using MVVM architecture
- Implemented real-time sync via REST API
- Built admin dashboards
- Designed intuitive UI with Kotlin/Jetpack Compose (Mobile) and HTML/CSS (Web)

ESPERANZA, GABRIEL JOSE S.
